MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 67 (1993)

Adenine nucleotides, purine catabolites, ischemia, reperfusion, aging, hypoxanthine salvage, 1
Age-dependent proliferation, PDGF A-chain mRNA, differential splicing, aortic smooth muscle, rat, 79
Ageing, cervical sympathetic trunk, preganglionic neurons, sympathetic nervous system, unmyelinated axons, 289
Ageing, dolichol, *Drosophila*, 91
Ageing, dopamine release, microdialysis, corpus striatum, rat, 261
Ageing, in vitro senescence, T lymphocytes, cytotoxicity, memory T cell, 173
Ageing, iron, *Drosophila*, tea, calcium, life span, 227
Ageing, pentane, lipid peroxidation, antioxidant, 141
Aging, 2′,5′-oligoadenylate synthetase, RNase 1, antiviral defense, 101
Aging, adenine nucleotides, purine catabolites, ischemia, reperfusion, hypoxanthine salvage, 1
Aging, atenolol, enantiomers, renal failure, stereoselective pharmacokinetics, 201
Aging, exercise training, Long-Evans strain, epitrochlearis, flexor digitorum brevis, 187
Aging, free radical, glutathione, senescence accelerated mouse, 129
Aging, free radicals, antioxidant enzymes, glutathione, life span, glutathione reductase, 115
Aging, human mortality, causes of death, Kernel method, onset, 247
Aging, macrophage, T lymphocyte activation, PG-E_2, H_2O_2, TGF-β2, 33
Aging, mortality, epidemiology, Gompertzian analysis, 239
Aging, non-Hodgkin's lymphoma, mortality, epidemiology, 65
Aging, red blood cells, inositol trisphosphate, 13
Aging, thymus, T cell development, mathematical model, simulations, 159
Alzheimer's disease, genetically-determined longevity, senile neuropathy, CBA T6/T6 mice, animal model, 269
Animal model, genetically-determined longevity, senile neuropathy, Alzheimer's disease, CBA T6/T6 mice, 269
Antioxidant enzymes, aging, free radicals, glutathione, life span, glutathione reductase, 115
Antioxidant, pentane, lipid peroxidation, ageing, 141
Antiviral defense, 2′,5′-oligoadenylate synthetase, RNase 1, aging, 101
Aortic smooth muscle, PDGF A-chain mRNA, differential splicing, rat, age-dependent proliferation, 79
Atenolol, aging, enantiomers, renal failure, stereoselective pharmacokinetics, 201

Baroreflex aging, catecholaminergic lesions, nucleus tractus solitarius, reflex bradycardia, 6-hydroxydopamine, 47

Calcium, iron, *Drosophila*, ageing, tea, life span, 227
Catecholaminergic lesions, baroreflex aging, nucleus tractus solitarius, reflex bradycardia, 6-hydroxydopamine, 47
Causes of death, human mortality, Kernel method, aging, onset, 247
CBA T6/T6 mice, genetically-determined longevity, senile neuropathy, Alzheimer's disease, animal model, 269
Cell death, rat, superior cervical ganglion, morphometry, tyrosine hydroxylase, neuropeptide Y, neuron-specific enolase, 211
Cervical sympathetic trunk, ageing, preganglionic neurons, sympathetic nervous system, unmyelinated axons, 289
Chromatin rearrangements, cytodifferentiation, TV image analysis, 21
Collagen, fibroblasts, gel culture, gel contraction, in vitro aging, 149

Corpus striatum, dopamine release, microdialysis, ageing, rat, 261
Cytodifferentiation, chromatin rearrangements, TV image analysis, 21
Cytotoxicity, in vitro senescence, T lymphocytes, memory T cell, ageing, 173

Differential splicing, PDGF A-chain mRNA, aortic smooth muscle, rat, age-dependent proliferation, 79
Dolichol, ageing, *Drosophila*, 91
Dopamine release, microdialysis, Corpus striatum, ageing, rat, 261
Drosophila, dolichol, ageing, 91
Drosophila, iron, ageing, tea, calcium, life span, 227

Enantiomers, aging, atenolol, renal failure, stereoselective pharmacokinetics, 201
Epidemiology, aging, mortality, Gompertzian analysis, 239
Epidemiology, non-Hodgkin's lymphoma, mortality, aging, 65
Epitrochlearis, exercise training, aging, Long-Evans strain, flexor digitorum brevis, 187
Exercise training, aging, Long-Evans strain, epitrochlearis, flexor digitorum brevis, 187

Fibroblasts, collagen, gel culture, gel contraction, in vitro aging, 149
Flexor digitorum brevis, exercise training, aging, Long-Evans strain, epitrochlearis, 187
Free radical, aging, glutathione, senescence accelerated mouse, 129
Free radicals, aging, antioxidant enzymes, glutathione, life span, glutathione reductase, 115

Gel contraction, collagen, fibroblasts, gel culture, in vitro aging, 149
Gel culture, collagen, fibroblasts, gel contraction, in vitro aging, 149
Genetically-determined longevity, senile neuropathy, Alzheimer's disease, CBA T6/T6 mice, animal model, 269
Glutathione reductase, aging, free radicals, antioxidant enzymes, glutathione, life span, 115
Glutathione, aging, free radical, senescence accelerated mouse, 129
Glutathione, aging, free radicals, antioxidant enzymes, life span, glutathione reductase, 115
Gompertzian analysis, aging, mortality, epidemiology, 239

H_2O_2, aging, macrophage, T lymphocyte activation, PG-E_2, TGF-β2, 33
Human mortality, causes of death, Kernel method, aging, onset, 247
6-Hydroxydopamine, baroreflex aging, catecholaminergic lesions, nucleus tractus solitarius, reflex bradycardia, 47
Hypoxanthine salvage, adenine nucleotides, purine catabolites, ischemia, reperfusion, aging, 1

In vitro aging, collagen, fibroblasts, gel culture, gel contraction, 149
In vitro senescence, T lymphocytes, cytotoxicity, memory T cell, ageing, 173
Inositol trisphosphate, red blood cells, aging, 13
Iron, *Drosophila*, ageing, tea, calcium, life span, 227
Ischemia, adenine nucleotides, purine catabolites, reperfusion, aging, hypoxanthine salvage, 1

Kernel method, human mortality, causes of death, aging, onset, 247

Life span, aging, free radicals, antioxidant enzymes, glutathione, glutathione reductase, 115
Life span, iron, *Drosophila*, ageing, tea, calcium, 227
Lipid peroxidation, pentane, ageing, antioxidant, 141
Long-Evans strain, exercise training, aging, epitrochlearis, flexor digitorum brevis, 187

Macrophage, aging, T lymphocyte activation, PG-E_2, H_2O_2, TGF-β2, 33
Mathematical model, thymus, T cell development, aging, simulations, 159
Memory T cell, in vitro senescence, T lymphocytes, cytotoxicity, ageing, 173
Microdialysis, dopamine release, Corpus striatum, ageing, rat, 261
Morphometry, rat, superior cervical ganglion, tyrosine hydroxylase, neuropeptide Y, neuron-specific enolase, cell death, 211
Mortality, aging, epidemiology, Gompertzian analysis, 239
Mortality, non-Hodgkin's lymphoma, aging, epidemiology, 65

Neuron-specific enolase, rat, superior cervical ganglion, morphometry, tyrosine hydroxylase, neuropeptide Y, cell death, 211

Neuropeptide Y, rat, superior cervical ganglion, morphometry, tyrosine hydroxylase, neuron-specific enolase, cell death, 211
Non-Hodgkin's lymphoma, mortality, aging, epidemiology, 65
Nucleus tractus solitarius, baroreflex aging, catecholaminergic lesions, reflex bradycardia, 6-hydroxydopamine, 47

2′,5′-Oligoadenylate synthetase, RNase 1, aging, antiviral Defense, 101
Onset, human mortality, causes of death, Kernel method, aging, 247

PDGF A-chain mRNA, differential splicing, aortic smooth muscle, rat, age-dependent proliferation, 79
Pentane, lipid peroxidation, ageing, antioxidant, 141
PG-E_2, aging, macrophage, T lymphocyte activation, H_2O_2, TGF-β2, 33
Preganglionic neurons, ageing, cervical sympathetic trunk, sympathetic nervous system, unmyelinated axons, 289
Purine catabolites, adenine nucleotides, ischemia, reperfusion, aging, hypoxanthine salvage, 1

Rat, dopamine release, microdialysis, Corpus striatum, ageing, 261
Rat, PDGF A-chain mRNA, differential splicing, aortic smooth muscle, age-dependent proliferation, 79
Rat, superior cervical ganglion, morphometry, tyrosine hydroxylase, neuropeptide Y, neuron-specific enolase, cell death, 211
Red blood cells, aging, inositol trisphosphate, 13
Reflex bradycardia, baroreflex aging, catecholaminergic lesions, nucleus tractus solitarius, 6-hydroxydopamine, 47
Renal failure, aging, atenolol, enantiomers, stereoselective pharmacokinetics, 201
Reperfusion, adenine nucleotides, purine catabolites, ischemia, aging, hypoxanthine salvage, 1
RNase 1, 2′,5′-oligoadenylate synthetase, aging, antiviral defense, 101

Senescence accelerated mouse, aging, free radical, glutathione, 129
Senile neuropathy, genetically-determined longevity, Alzheimer's disease, CBA T6/T6 mice, animal model, 269
Simulations, thymus, T cell development, aging, mathematical model, 159
Stereoselective pharmacokinetics, aging, atenolol, enantiomers, renal failure, 201
Superior cervical ganglion, rat, morphometry, tyrosine hydroxylase, neuropeptide Y, neuron-specific enolase, cell death, 211
Sympathetic nervous system, ageing, cervical sympathetic trunk, preganglionic neurons, unmyelinated axons, 289

T cell development, thymus, aging, mathematical model, simulations, 159
T lymphocyte activation, aging, macrophage, PG-E_2, H_2O_2, TGF-β2, 33
T lymphocytes, in vitro senescence, cytotoxicity, memory T cell, ageing, 173
Tea, iron, *Drosophila*, ageing, calcium, life span, 227
TGF-β2, aging, macrophage, T lymphocyte activation, PG-E_2, H_2O_2, 33
Thymus, T cell development, aging, mathematical model, simulations, 159
TV image analysis, cytodifferentiation, chromatin rearrangements, 21
Tyrosine hydroxylase, rat, superior cervical ganglion, morphometry, neuropeptide Y, neuron-specific enolase, cell death, 211

Unmyelinated axons, ageing, cervical sympathetic trunk, preganglionic neurons, sympathetic nervous system, 289
